## Imagine one location for women's health

Women's medical imaging needs are diverse.

There are times in our lives when we need fetal ultrasound, other stages at which we require bone density testing and mammography.

As a part of UCSF Imaging's ongoing goal of making medicine more personal and local, we founded the [UCSF Imaging Center at Montgomery Street](#).

This convenient location provides comprehensive imaging services as well as the convenience of multiple practices located on one floor: UCSF Imaging Center, UCSF Women's Health Primary Care, Golden Gate Obstetrics & Gynecology, and Golden Gate Skin Center.

Link [here](#) to refer patients.

---

## Meet some of the Montgomery Street staff and providers

**[Ruth Goldstein](#)**, MD, is UCSF Radiology's chief of ultrasound. She also treats patients at the Montgomery Street clinic. "I love what we're doing at Montgomery street. We understand that peace of mind and tranquility are important to great health."

Ruth Goldstein, MD

L'Ree Brown

L'Ree Brown has spent over twenty years helping patients in a variety of UCSF offices. At Montgomery Street, he ably manages front office operations and makes patients feel at home. Lately, Brown has been involved in the [EXCEL](#) program which trains administrative staff for UCSF positions.

Cindy Lee, MD, treats patients at the Montgomery Street clinic. Lee is also a researcher. In spring, 2016, she and colleagues published a study in the [American Journal of Roentgenology](#) that analyzed data from over 3 million mammograms on the National Mammogram Database with the goal of helping doctors compare their performance with their peers.

---

## Communicating with You:

We consider communicating with our referring physicians vital to our mutual success, and to the best patient care. To that end, we regularly ask people like you to complete very brief surveys (sometimes just one question) about who to best stay in touch with you. You can see our current survey question [here](#). The results are posted to our [LinkedIn group](#), which you're welcome to join.

## About Us:

The Department of Radiology and Biomedical Imaging at the University of California, San Francisco is a leading health sciences center focused on serving patients, conducting research, and training the next generation of radiologists. We are proud to have some of the foremost names in diagnostic, therapeutic, and interventional radiology developing promising new approaches to identify and treat disease. We are a patient-centered team, and are proud that the community recognizes us for our compassion and care.

---

## [Get world-class imaging for your patients -- How to refer.](#)

It is our privilege and pleasure to work with you by providing world-class imaging services to your patients. We look forward to partnering with you to deliver the best possible patient outcomes. Please call our scheduling department at (415) 353-2573 or [contact us](#) anytime.
