Communication: Just one part of world-class radiology

We hope you find our newsletter helpful. At UCSF Imaging, we consider communication essential to collaboration and great patient care. Learn how we partner with physicians to serve patients.

[Watch our Video](#)

[Tumor ablation, a remarkable treatment advancement for patients with certain tumors](#)

Image-guided ablation techniques can burn or freeze small tumors, including kidney tumors, avoiding invasive, costly, and time-consuming surgeries.

[Ablation Lecture](#)

Meet some of the kidney tumor ablation collaborators

Kirsten Greene, MD

Patients with kidney tumors often have treatment options. Urologist Kirsten Greene, MD, [coordinates with UCSF Imaging](#) so patients can receive ablation. We consider collaboration with our referring physicians critical to successful patient outcomes.

Ronald Zagoria, MD

After performing hundreds of kidney tumor ablations, Ronald Zagoria, MD, has the information patients need to make informed decisions about their care. That helps patients feel empowered--and it gets them back to the [lives they love.](#)

What is this image? [Learn about this scan.](#)

(Hint: There's a procedure that treats conditions such as this so successfully that best-selling thriller author John Grisham's focused his latest novel on it.)
