

Master of Science in Biomedical Imaging

- One year Master of Science program (part-time, 2-3 years available)
- Great for gap year before professional (medical, dental, etc) or PhD programs
- Incoming students: ~50% from life sciences, ~50% from engineering/CS majors, 10% international
- Learn the underlying physics and applications of medical imaging
- One \$5k scholarship available

“Every faculty member of the department was more than happy to take time out of their busy day to explain concepts or explore topics beyond the curriculum.”

- MSBI Alumni

“I couldn’t imagine a better program.”

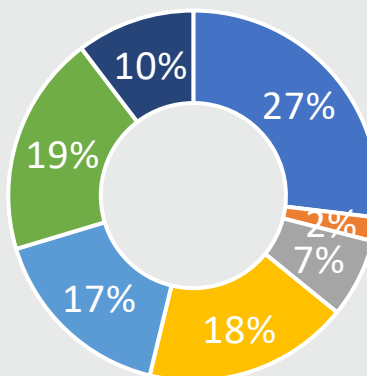

“...all of it gave me the skills I needed to succeed in academia”

... very influential to getting me to my current successful career...

-MSBI alumni

- Small class sizes, close interactions with faculty
- Perform research (optional) with world-class faculty in a wide range of areas:
 - PET Probes & Molecular Therapy
 - Wet-lab Science
 - Clinical & Advanced Imaging
 - Computational Modeling
 - Artificial Intelligence

Alumni

- MD
- MD/PhD
- Other Healthcare
- PhD
- Academia
- Industry
- Unknown
